

Abstract of the Disclosure

1 A player makes a wager on a first round of video poker.
2 If the player achieves a winning hand combination on the
3 first round of video poker, the player is offered the
4 opportunity to play one or more hands of video poker against
5 a higher pay table on the next round of video poker. The
6 player may continue to play against the higher pay table as
7 long as the player continues to achieve winning combinations
8 during each round of play. If the player fails to achieve a
9 winning combination during a round of play, the game resets
10 to the initial lower pay table and the player starts over.
